RCS Educators Recognized for Use of Blended Instruction

RICHMOND, April 19, 2018 – RCS educators Katie Belanga and Monica Hoffman have received the 2018 Mathspace Esteemed Educator Award. They have been recognized for their impressive use of blended instruction. Blended learning has its roots in online learning and represents a fundamental shift in instruction. Blended learning provides students with a true “blend” of instruction that gives them some element of control over their learning. Mathspace is an online mathematics program designed for students aged between 7 and 18. Mathspace uses an adaptive learning model to personalize the software experience for each student. The software assesses each student’s performance and generates accompanying report statistics.

Belanga and Hoffman are two of the top 200 teachers from across the nation. Belanga is a math teacher at Test Intermediate School. Hoffman is a math teacher at Dennis Intermediate School. They each received a gift and an award certificate from Mathspace.

###

The Richmond Community School District provides each of its 5,000 students with a superior education in a safe and challenging environment and is committed to graduate every child career and college ready. For more information, please visit
