

## Master Planning Meeting

Hibberd

02/13/2018

Rob spoke on the Master Planning Process.

- RHS Renovation
- Educational Visioning
- Survey of all buildings (All in good shape)
- RHS Historical Status
- Demographics study
- Capacity Study

The point of these meetings is to give the board multiple pieces of information to use to make the final decision.

Introductions

### Questions-

#### **Is Hibberd on the chopping block?**

No decisions have been made at this point.

#### **Why does Hibberd not have sports teams?**

#### **Will there be a system used on what programs will stay and what will not stay?**

Everything is still in discussion

#### **Can homeschool students participate in sports?**

Believe there is a policy on this about being enrolled in a certain number of classes but we will need to check the policy

#### **It is getting so late in the year, is there really time for something to be changed for next year?**

It depends on the decision that is made.

#### **Someone said that nothing will be done for next year, is that true?**

It depends on the decision that is made. It would be difficult if the decision that is made is the most drastic.

### Comments-

- I drive from out of town every day to work. Whenever people find out where I work, they always have positive things to say about it.
- We have three separate programs but it has become one big family.
- It has taken a long time for that so now that it is a blended family it would be sad to see that disrupted.
- Parents are looking for "that school" This is the "that school" they are looking to take their kids to.

- Important to keep Early College, the older students come back and talk to the students about how they benefitted from Early College. The students get to know all the students and staff and they also work some with the RHS Early College students.
- There is culture here in this school that doesn't exist anywhere else.
- I am a parent as well as employee; I have had kids at several schools. The problems in other buildings are not seen here. They aren't even on the radar with these kids.
- We are all about the programs here. Staff, parents, students, they all buy in to their programs and they cross programs and work well together.
- I am lucky to be here. This is one of the greatest jobs in the district. I respect that the teachers care about their programs plus everyone else's program. Well oiled machine
- RHS Early College students and the middle school Early College students all meet together. It would be nice if they could meet more often.
- The students that enter Hibberd in the third grade have a great opportunity. To be able to be here from third-eighth grade is wonderful.
- The LifeSkills program has an amazing area with full kitchen and open pod area. It is a nice community area with a family atmosphere.
- Their creative arts program is a marriage of all three programs. Kids are mixed together.
- None of the options showed where Lifeskills would go
- They have all been able to form a special environment. Kids are coming from county schools just to go to Hibberd. All three of their programs are attracting families from out of town.
- Hibberd needs Communities in Schools.
