

## **Community Input Meeting – November 2<sup>nd</sup> Charles Elementary 85 in attendance**

### **Survey Questions**

1. Comment: Would like to have had questions geared for only high school, only intermediate, and only elementary. Answer: The meetings in January will have the three areas broken down.
2. Comment: Will the students have a chance to take this survey? Answer: Great Idea
3. Comment: Our choices for answers were very broad. We had to choose from a safe school or a nicely landscaped school. It is unfair to ask “this or that”. Safety questions should not be combined with landscaping.

### **Demographic Study**

1. Comment: How do the studies compare to the studies that were done approximately 6 years ago? Answer: The studies have not been compared at this time.
2. Comment: Were the projected numbers based strictly on what was listed? Answer: Yes
3. Comment: Makes sense to look at the demographic survey that was done 6 years ago to see how the numbers held up.
4. Comment: Looking at the growth of population...different types of jobs are moving in...did the survey take into consideration what jobs might be coming into the community? Example – In his experience, manufacturing jobs are leaving but IT jobs are growing.

### **Additional**

1. Comment: Need more options for grade elementary grade configurations. Example PreK – 2 and 3 – 5.
2. Comment: Why was the Baxter building missing from the 10 year projections?
3. Comment: Not heard about the diversity or programs in the schools. Answer: Will come in January.
4. Comment: What is the plan going forward regarding the schools reaching capacity? Changing boundaries? Closing schools? Answer: Right now everything is on the table.
